

Below is a list of all parts that were used to build the setup used in Toledo Excel Summer 2025 workshop activities.

BME 280 (Temperature, Humidity and Pressure Sensor)

<https://a.co/d/iBONJ1r>

BH 1750 (Light Intensity Sensor)

<https://a.co/d/hlhvgOh>

Capacitive Soil Moisture Sensor

<https://a.co/d/aqY5uCF>

ESP32 Microcontroller

<https://a.co/d/aHFEF0y>

Breadboard and Jumper Wires

<https://a.co/d/j0YpLs8>

Solder (in case the chips do not come presoldered)

<https://a.co/d/2JAtgGJ>

The ESP32 Setup was programmed using Arduino IDE. The code is available in this same GitHub repository.

Feel free to reach out for any further questions about the setup.
